New Patient Supplement Pack

Welcome to our holistic/functional medicine practice. On behalf of all of us at Paws & Claws Animal Hospital and Holistic Pet Center, we are happy to have you join our family of happy pet lovers who cherish a more natural approach to wellness and healing.

Because we believe in the value of nutritional supplements for all of our patients, we have put together several supplements to aid in keeping your pet healthy, happy, and long-living.

First, we prescribe our Advanced Revitalizing Formula, a vitamin-mineral supplement designed to provide immune support for your pet.

Second, we prescribe our Enzyme and Probiotic Formula, which aids in digestion and absorption of nutrients, as well as ensuring maximum GI health as well as additional immune support.

Finally, we prescribe our omega-3 fatty acid supplement, which reduces inflammation in your pet's body and also helps with a variety of medical disorders.

For pets 5 years of age and older, we also prescribe either Cholodin or Total Brain to provide support for your pet's nervous system. The goal is to reduce the chance or delay the onset of your pet developing cognitive disorder (Alzheimer's disease.)

If you follow this simple supplement regimen, your pet will likely experience outstanding health and reduced disease that is very common among our patients.

Finally, don't forget that if you refer a friend or family member (no limit on how many folks you can refer,) to our practice, that person will save \$25 on the first visit AND you will save \$25 on your next visit (remind the person to mention that you referred him/her in order for both of you to save \$25!)

Again, welcome to our family! We look forward to a long relationship of outstanding health for your pet
